🔲 Company Overview

Legendary Concepts Ltd is a Cleveland-based custom software development firm specializing in mission-critical systems and enterprise-scale applications. With over 25 years of experience, we help government agencies and public businesses develop new enterprise applications, modernize legacy systems, automate workflows, and deliver secure, scalable, and high-performance solutions using Microsoft products and other supported third party tools.

🧠 Core Competencies

- Custom Software Development (.NET, C#, SQL Server, Entity Framework)
- REST & SOAP API Design and Integration
- DevOps and CI/CD Automation (Azure DevOps, Git, Jenkins)
- Database Optimization and ETL (SSIS, PowerShell)
- System Architecture & Refactoring
- Reporting and Dashboards (SSRS, Power BI, In application solutions)
- Application Monitoring & Automation

📦 Past Performance

- **NASA Mishap Management System** – Designed, developed, and maintained an agency-wide risk platform, supporting real-time safety analysis across all NASA centers.

- **Cleveland Metropolitan School District** – Built compliance and truancy reporting systems, streamlining data submission and increasing operational productivity.
- **ADAMHS Board** – Refactored mission-critical legacy code and automated SQL tasks for mental health services in Ohio.
- **Multiple Private Sector Contracts** – Delivered document indexing systems, hiring & performance platforms, and migrated legacy VB6 systems to .NET.

💡 Differentiators

- Proven leadership in government technology projects
- Deep experience with high-security, compliance-focused systems (NASA, HIPAA)
- Expert in modernizing legacy software with minimal downtime
- Agile, responsive, and capable of turnkey solutions as a solo contractor or with a team
- Ohio-based and committed to supporting regional public sector initiatives
